

PROJECT DESIGN COMPETITION

2009 ROAD DESIGN CONFERENCE

Project Design Competition Instructions

When submitting a project for a poster display, please include one project per county, no more than 24x36 inches, as part of your display so that we can attach them to the walls along with an 8x11 report describing the project and design process to include:

- Overview Information
 - Title of Project
 - Name of the County
- Full contact information on the description of the county participation efforts (number of members and time committed)
- An explanation on the economics of the product in terms of cost and potential value added to the public
- One or two innovative points
- If possible bring your entire set of plans and pdfs to share with other counties so that they can take them back and maybe incorporate your ideas into their future plans.

Projects will be placed on display in throughout the conference period for viewing, during which time participants will circulate and talk to individual counties in an informal manner. The posters will then remain available to conference participants throughout the conference and after very careful scrutiny and examination on by your peers, they will be voted upon.

There will only be allowed one vote per participant which they will indicate by putting a sticker dot on the poster that will be provided in their registration packet at the first day. The winning County will be announced at the wrap-up session on the final day of the conference.

Please address Project Design Competition questions to Jim Ayres, P.E, Design Systems Engineer
